Increase excitement and performance in students!

We asked 4,000+ students and teachers from 100+ countries about their experience with Lifeliqe content.

97 %

students
got more engaged
in lessons.

98 %

students
understood more
difficult topics better.

97 %

students
felt more excited
about learning.

students in 3D classes
were more active.

Successful partnerships:

Leading Thai educational textbook publisher. Students open Lifelique's 3D models via QR codes in Aksorn's textbooks.

“For Aksorn, varieties of Lifelique’s interactive 3D models help enhance the quality of our learning media and fulfill our learning ecosystem, which is fundamental to facilitating and preparing Thai students for the future. Their Interactive 3D models are also user-friendly and able to support any devices in the market. They even have particular functions where you can extend its uses in many different ways. This results in the creation of more fun, yet knowledgeable classroom nationwide.”

Yanipach Arpornsangwijit, Digital Content Development, Aksorn

i3LEARNHUB

Collaborative learning platform from i3-Technologies. The premium user is able to access and use Lifeliqe's 3D models directly from i3LEARNHUB's content library.

"i3LEARNHUB and Lifeliqe are two powerful platforms that enable me to teach in innovative way. I can use the 3D models to write on, manipulate and share with my students. This way I can give them a new way to look at the world around them."

Olivier Dijkmans, Teacher and i3LEARNHUB ambassador, Omnimundo School
